3	OUTPUT CODE	7-8
4	CONCLUSION	9

INTRODUCTION

This project is a Grade Calculator made using HTML, CSS and JavaScript. HTML and CSS are used for the design of the page, and JavaScript is used for the logic. User will enter marks and JavaScript will calculate total, percentage and grade automatically. The main aim is to show how JavaScript works with user input.

INPUT CODE

```

<!DOCTYPE html>
<html>
<head>
  <title>Grade Calculator</title>

  <style>
    body {
      font-family: Arial;
      background-color: lightgray;
    }

    .container {
      width: 500px;
      margin: 30px auto;
      background-color: rgb(126, 139, 173);
      padding: 20px;
      border: 1px solid black;
    }

    h1 {
      text-align: center;
    }

    input {
      width: 95%;
      padding: 8px;
      margin: 5px 0 10px;
    }

    button {
      padding: 10px 20px;
      margin: 5px;
      cursor: pointer;
    }

    #result {
      margin-top: 20px;
      padding: 10px;
      border: 1px solid black;
    }
  </style>
</head>

<body>

  <div class="container">

    <h1>Grade Calculator</h1>

```

```

<label>Student Name</label>
<input type="text" id="name">

<label>Maths Marks</label>
<input type="number" id="maths">

Result

Student Name: Chandan

Total Marks: 157 / 500

Average: 31.40

Percentage: 31.40%

Grade: F

Result: Fail

Conclusion:

We have successfully created a Grade Calculator using JavaScript. This project helped me learn JavaScript basics like functions, if-else conditions and DOM manipulation. In future we can add more features like CGPA calculation and result storing.
