INTRODUCTION

The MCA Department webpage is designed to provide information about the Master of Computer Applications program. It includes details about the department, faculty, courses, timetable, achievements, events, and contact information. HTML is used to create the structure of the webpage, while CSS is used to style the headings, navigation bar, images, sections, and other elements. The webpage also uses internal links to navigate between different sections.

Conclusion

This project successfully demonstrates how basic HTML and CSS can be used to build a clean, functional event webpage. It covers all the essential sections needed for a college event details, schedule, speakers, and registration making it easy for students and visitors to get the information they need in one place.
